

Daily Work Report – 01/12/2025

Work Summary – Attendance app

Encryption Process Almost Completed:

Made significant progress in finalizing the **encryption and decryption workflow**, ensuring secure data transmission across the application. The core implementation is nearly completed, covering both request and response encryption layers.

Resolved Encryption & Decryption Errors:

Identified and fixed all remaining issues that occurred during the encryption and decryption stages. This included addressing key mismatches, incorrect encoding formats, payload structure issues, and inconsistencies between encrypted input/output.

These fixes have resulted in a **stable, reliable, and fully functional encryption module**.

Planned Work for 02/12/2025 :

1. Encryption
2. Implementing AI/ML

Name: Cinda Sibichan

Role: Python Developer

Organization: Ziya Academy LLP
